## Summary

Passionate web developer with 2+ years of experience as a full-stack website developer. I love making beautiful user interfaces and working on ambitious projects with positive people.

## Education

### Bachelor of Software Engineering

Sudan University for Science and Technology  
March 2016 - December 2020

## Work Experience

### Fullstack website Developer

Arabian Computer Company - Khartoum, Sudan  
July 2021 - April 2023

- Worked on various projects, from gathering requirements and improving design of existing websites, to developing fully functional websites and deploying them on shared hosting based on client needs.
- Collaborated with other developers making awesome websites.

## Projects

### Arabian Computer Company Website

<https://arabian-computer.com>

- Enhanced the performance and search engine optimization (SEO) of the company's website.
- Modified the codebase and shifted to Laravel, Tailwind CSS, and Alpine.js.
- Developed a dashboard for the team to manage website content.

### Job posting website for the national civil service selection commission

- Developed a job posting website for government agencies where eligible students can apply for job openings based on qualifications and time of the application.
- Utilized Laravel, Inertia Vuejs, and Tailwindcss to create the platform.

### School Management System

Arabian Computer Company

- Developed a school system to manage student registrations and exam results calculations.
- Re-created the system using Laravel and added more features to it.

## Personal Portfolio

- Constructed a personal website that showcases my personal information and the projects I have worked on using Tailwind CSS and Nuxt.js.

## Languages and tools

- HTML, CSS, JavaScript, Sass, Tailwindcss, Bootstrap, Vue JS, PHP, MySQL, Laravel, Git, Github

## Skills

- Good understanding of key design principles.
- Good understanding of SEO Principles and how to apply them.
- Creating good-looking and responsive websites using modern technologies.
- Creating dynamic websites and single-page applications.
